

Comply with the law

TIME CONTROL

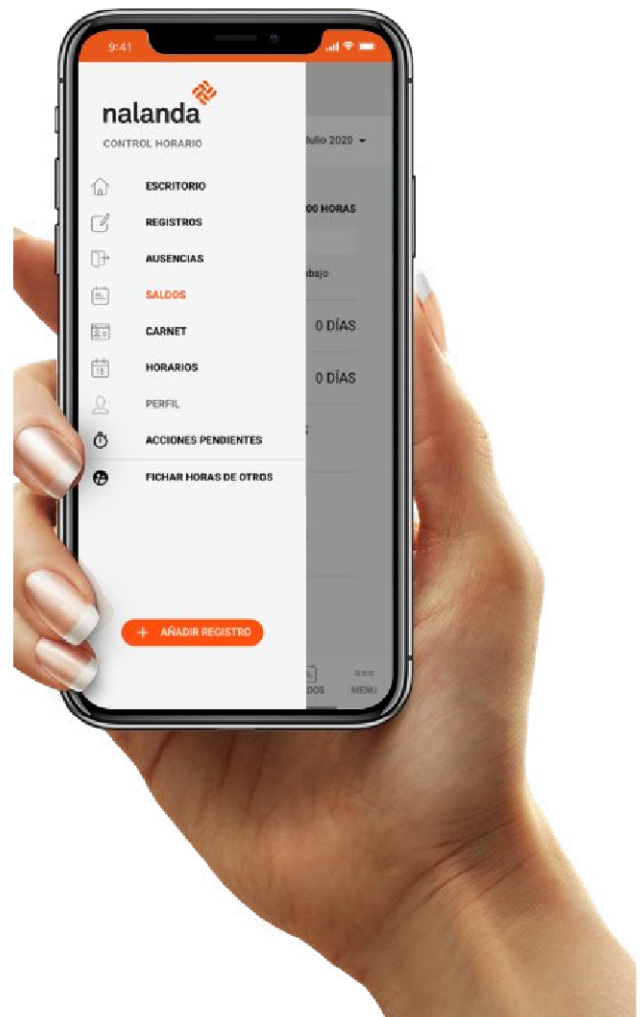

Control that your company complies with any time control law, make easier for your employees to record their hours worked, vacations and absences through a simple app, and obtain control reports to improve the management of your human resources and their access to your work centers.

What is it

A powerful cloud that allows your employees to record their hours worked, vacations, absences and balances of **hours worked based on the schedules** they have established using a simple App from anywhere.

Your company will have **all kind of control reports** and in case you need to control the physical presence of employees in some of your work centers. You can also use our **access control devices** so that your employees can scan the cards that are integrated into the App.

If you also want **to condition access to any type of documentation**, training for the trades that they will perform or the risks they will incur, including **Covid-19**, only our App will allow you to achieve it.

How does it work

Your employees will only have to download the App, register, and once your company approves the registration and assigns them one of the work calendars that you have previously defined, the workers will be able to use the App.

One or more administrators in the company will be able to edit the records to make adjustments and obtain time control reports for any period of time and export them to Excel.

If you decide to install readers or turnstiles in some work centers, the reading of the identification cards that the worker can present from her smartphone will clear the way and will count all entrances and exits.

If you wish, **you will be able to add an additional intelligence layer so that your employees or any other collaborator, has the passage conditioned to any type of documentation**, PPE, professional training, or compliance with any protocols.

What benefits do you get

Comply with the law

Comply with any current time control legislation.

Total control over absences, leaves, vacations and working hours

Share all the information so you employees can manage themselves and make teleworking hours more flexible.

Promote self-management and self-control of your employees

If they have the same information as you, they will give the best of themselves and will depend on the data and not on personal impressions.

Simplicity and security for your employees

The learning curve of the App is short and fast. Your employees will know how to use it from the first moment.

Additional and unique layer of document control intelligence

Our experience in document management is at your service in order to condition access to work centers to employees who meet the necessary documentation, risk prevention and training requirements.

Connect it with our access control devices if you need it

If you want to control access to your work centers, our service integrates both functionalities.

Easily monitor the hours of your employees

Know in real time the hours worked, who is in their working day and the balance of hours of each employee.

Generate all kinds of reports online and export them to Excel to make smart decisions

Monthly, weekly, daily, tailored to your needs, and for everyone or by workplace, with or without signature portfolios so that you can intelligently manage your HR.

You pay only for what is actually used in a time control application

We focus on the functionalities that are really used to simplify the management of your employees' schedules

Pay only for what is actually used in a time control application

We focus on the functionalities that are really used to simplify the management of your employees' schedules.

Sign-in at workplace without physical contact between employees and devices

Your employees will carry their identification card on their Smartphone and will only have to present it to our access devices.

Why is it the most convenient

Pay only for the features you need

Our rates are the most competitive because we develop our service based on what we know you are actually going to use.

Integrate the data with whatever you want
